

Coast Papamoa Beaches

KlassikDrain K200

Beaches Coast Papamoa is an exclusive residential development situated on the coast near Papamoa. The subdivision includes a shared landscaping area, with outdoor showers, bench seating and a large landscaped area.

Stormwater engineers were concerned about drainage on the flat site. Kerb and channel was not an option as disabled access was required along the street, and no surface water was to be allowed.

ACO's KlassikDrain sloped K200 with Heelsafe® Anti-Slip grates were chosen, providing a pedestrian-friendly trafficable grating on top of channel sloping to in-line sumps: efficient and subtle drainage for the site.
