

Continental Cars Ferrari

KlassikDrain KS100 & Cantilever ThresholdDrain

www.acodrain.co.nz

Continental Cars' Ferrari dealership is a flagship store for the brand. Strict corporate guidelines dictated many of the design decisions, however ACO was able to provide a solution for New Zealand specific level threshold drainage.

The fit out of the interior featured the signature Ferrari red, and liberal amounts of stainless steel. Architects sought to link inside and out by using the Stainless Steel 5 star Heelsafe® Anti-Slip grate at level thresholds.

A combination of KlassikDrain KS100 for vehicle entrances, and E2 compliant Cantilever ThresholdDrain for pedestrian entrances allowed a code compliant solution. Matching grates across both products tied the project together with the aesthetic demanded by Ferrari.
