

ACO Access

Rhinocast® Access Cover

PORTFOLIO

Northwest Shopping Centre

The major redevelopment of the Westgate suburb in Auckland saw a new 2.7 hectare flagship shopping centre open in October 2015. Throughout the new shopping centre, services such as power and data required access chambers. ACO has a wide range of access covers to suit both internal and external applications, and all visual design requirements. With a high quality aesthetic finish, designers and contractors needed an access cover solution that would minimise the visual impact on the floor surfaces. Therefore ACO's **Rhinocast®** Access Cover with a stainless steel decorative edge was chosen.

Benefits

- The recessed **Rhinocast®** access cover offers the ability to fill the cover with tiles to match or complement the surrounding pavement, preserving the continuity of the floor surface.
- For an attractive finish a stainless steel decorative edge can be fixed.
- Certified to AS 3996 Class B loading.
