

ACO Pipe

## ACO Stainless 316 Push Fit Pipe

PORTFOLIO

### PAK'nSAVE Invercargill

ACO supplied its Pipes for the PAK'nSAVE supermarket in Invercargill. ACO Pipes are made from grade 316 stainless steel which makes them durable, corrosion resistant and low on-going maintenance. The system is fast and easy to install thanks to push fit functionality and completely compatible with ACO's point and linear drainage systems. For this project ACO also supplied the ACO System 100 channel drain with vinyl clamps and the ACO stainless 316 Gully 157 & 218 with stainless strainer baskets and anti-slip ladder grates to provide a durable complete solution.

### Benefits

- Components comprise a unique double lip sealing system, ideal for extraneous conditions.
- Suitable for either push-fit or weld-up connection methods.
- Low coefficient of thermal expansion compared with HDPE.
- Better geometric concentricity, fitting design and weld quality than any other product in the industry.
