

ACO HygieneFirst

Hygienic Gully 157 with mesh grate

PORTFOLIO

New World Ravenswood Canterbury Region

Foodstuffs New World Ravenswood supermarket was built in 2021 for a growing residential area in the North Canterbury region. The ACO Building Drainage products inside have a hygienic design and are made from 316 grade stainless steel. A couple of hygienic floor waste gullies were installed in the kitchen, the butchery and chiller rooms. The hygienic design minimises the risk of bacterial growth and provides efficient drainage. Furthermore, the products are fast and easy to clean due to CIP (Clean in Place) properties, which suits the fast-paced environment of a Foodstuffs supermarket.

Benefits

- The stainless steel 316 body and grate provide a highly hygienic solution.
- Integrated foul air trap and removable strainers.
- Slip resistant mesh grate ensuring safe passage.
- Chemical resistance.
- Fully welded hygienic joints ensure easy cleaning.
