

A photograph showing a close-up of a building's glass entrance. A blue, textured drainage grate (ACO KlassikDrain K100) is installed along the base of the glass doors. The ground is covered in gravel. A dark downspout is visible to the right of the grate. The text 'ACO Drain' is overlaid in white on a red background.

ACO Drain

KlassikDrain K100

PORTFOLIO

Lincoln Road Stage 1

This project on Addigton's Lincoln Road started in winter 2020 and is turning damaged and dated buildings into a new and appealing retail development. ACO has been involved in the project, supplying threshold drainage along the facade of the building to prevent water from entering the buildings. ACO's KlassikDrain K100 together with **Heelsafe**® Anti-Slip galvanised longitudinal grates was chosen as an alternative E2 level entry solution for the ease of installation and superior hydraulic performance.

Benefits

- ACO's KlassikDrain K100 with **Heelsafe**® Anti-Slip galvanised longitudinal grates, providing a pedestrian friendly surface water management.
- Certified to AS 3996 Class B loading, the grate matches the NZTA load requirements.
- AS 1428.2 (Clause 9c) compliant for wheelchair and walking cane safety.
