

ACO Drain

KlassikDrain K100

PORTFOLIO

Bay Of Plenty Regional Council - Toi Moana

As the Regional Council in the Bay Of Plenty the Toi Moana institution looks mainly after environmental issues and development of the region but also is responsible for a healthy economical growth as well as social and cultural development. The head office in Whakatāne has been supplied by ACO's KlassikDrain K100 together with galvanised slotted grates. Protecting the building from surface water entering through the doors, the channel functions as an accepted E2 alternative threshold drain solution.

Benefits

- ACO's KlassikDrain K100 with galvanised slotted grates, matching the color of the paving material for an attractive finish.
- The KlassikDrain KS100 is an acceptable threshold drainage solution under E1.
- The system complies with AS 1428.2 (Clause 9c), Access and Mobility, ensuring safe passage of walking canes and wheelchairs.
