

ACO Drain

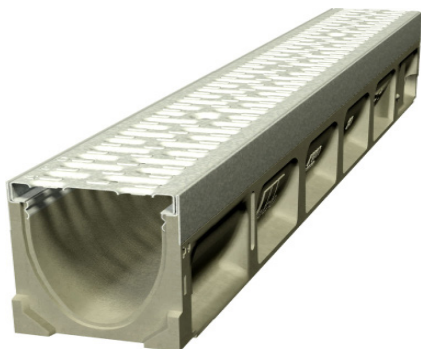

KlassikDrain K100

PORTFOLIO

Cornwall Park Cafe

Cornwall Park's welcomes around 4 million visitors each year, many stopping by for a coffee and brunch at the park's eponymously named cafe, rebuilt after a fire in 2015.

The architecture of the building drew on the local heritage, with a decidedly modern indoor-outdoor feeling. Diners sit inside and outside, so it was vitally important that the areas surrounding the building were clear of standing water.

Benefits

- ACO's KlassikDrain K100 with galvanised slotted grates, providing a light contrast to the coloured paving material for an attractive architectural finish.
- The installation flexibility allows the line of the drainage to match the landscaping features.
- Recesses in the edge rail fit around 'anti-shunt' lugs on the grate to prevent longitudinal movement.
