

ACO Drain

KlassikDrain K200

PORTFOLIO

### Coast Papamoa Beaches

Beaches at Coast Papamoa is an exclusive residential development situated on the coast near Papamoa. The subdivision includes a shared landscaping area, with outdoor showers, bench seating and a large landscaped area. Stormwater engineers were concerned about drainage on the flat site. Disabled access was required along the street, and no surface water was to be allowed. Designers therefore chose ACO's KlassikDrain K200 with Iron Intercept **Heelsafe**® Anti-Slip grates, ensuring safe and steady passage for wheelchairs and walkers.

### Benefits

- Iron Intercept grate with **Heelsafe**® Anti-Slip, providing a pedestrian friendly trafficable surface water management.
- Certified to AS 3996 Class D loading, the grate matches the NZTA load requirements.
- AS 1428.2 (Clause 9c) compliant, ensuring safe passage for wheelchairs and walking canes.
