

ACO Drain

KlassikDrain KS100

PORTFOLIO

#### Residential Redcliffs

Since the end of 2019, the houses in Redcliffs – Christchurch had been going through remediation and renovations work due to earthquake damages. This residential project shows a exemplary installation of E2 alternative level entry drainage. To complement the modern design of the residence with ocean view, ACO supplied the KlassikDrain KS100 drainage system as an accepted E2 alternative threshold drain solution under E1 of the NZ Building Code. The chosen longitudinal stainless steel grates underline the high quality amenities of the building and its open terrace. Overall ACO's product saved the builder time and was easy to install.

#### Benefits

- ACO's KlassikDrain KS100 with stainless steel **Heelsafe®** Anti-Slip longitudinal grates, providing a pedestrian friendly level threshold drainage.
- KlassikDrain K100 is an accepted threshold drain solution under E1, NZ Building Code.
- Certified to AS 3996 Class B loading, the grate matches the NZTA load requirements.
