

ACO Drain

KlassikDrain KS100

PORTFOLIO

Continental Cars Ferrari

Continental Cars' Ferrari dealership is a flagship store for the brand. Strict corporate guidelines dictated many of the design decisions, however ACO was able to provide a solution for New Zealand specific level threshold drainage. The fit out of the interior featured the signature Ferrari red, and liberal amounts of stainless steel. Architects sought to link inside and out by using the Stainless Steel 5 star **Heelsafe**® Anti-Slip grate at level thresholds.

Benefits

- Stainless Steel 5 Star grate with **Heelsafe**® Anti-Slip, providing a pedestrian friendly surface water management.
- The grates fit well in its interior environment and create an aesthetic architectural finish.
- The KlassikDrain KS100 is an acceptable threshold drainage solution under E1.
