

ACO Drain

KlassikDrain K100

PORTFOLIO

5 Mile Centre Frankton/Queenstown

ACO has been involved in Queenstown's 5 Mile Building project, supplying its KlassikDrain K100 system together with plastic **Heelsafe®** Anti-Slip grates along the retail section of the building. The drain was specified to collect surface water and protect the building cladding from ponding next to the building. ACO's grates ensure pedestrian safety being heelsafe, anti-slip, wheelchair, walking cane and bicycle safe. A must-have in such public spaces. The drain easily copes with high rainfall events and snow in the Queenstown area. Showing off the characteristic black colour, the grate's composite material convinces with its hard wearing nature

Benefits

- ACO's KlassikDrain K100 with Plastic **Heelsafe®** Anti-Slip grates, providing pedestrian friendly surface water management.
- Raised microgrip pattern on top of nodes for slip resistance.
- AS 1428.2 (Clause 9c) compliant for wheelchair and walking cane safety
