

ACO Drain

KlassikDrain K100

PORTFOLIO

Palmers Planet Westgate

Palmers Planet in the new \$1 billion Westgate shopping precinct draws on the European style of garden centres and has the largest retail area of any garden centre in New Zealand. Places where plants are watered and stored, any standing water would provide a hazard for shoppers. To help capture this excess water, designers chose ACO's KlassikDrain K100 with Type 478Q Ductile Iron **Heelsafe**® Anti-Slip grates. The 'V' channel profile encourages high liquid velocities with smaller volumes of water and is hydraulically superior to traditional 'U' shaped channels.

Benefits

- Ductile Iron grate with **Heelsafe**® Anti-Slip, providing a pedestrian friendly surface water management.
- AS 1428.2 (Clause 9c) compliant for wheelchair and walking cane safety.
- Certified to AS 3996 Class D loading, the grate matches the NZTA load requirements.
