

## ACO Drain

## KlassikDrain K100

PORTFOLIO

### Ebbett Volkswagen Hamilton

In August 2020, the new Volkswagen dealership in Te Rapa, Hamilton opened its doors to customers at their new site. It attracts customers with a new building, a bigger parking space and the whole precinct being twice as big as their prior location. Having a larger exhibition space to showcase their cars, the VW dealership increased their offer and overall created a greater shopping experience for their customers. ACO contributed to the project, supplying its KlassikDrain K100 with Ductile Iron slotted **Heelsafe**® Anti-Slip grates, reliably collecting the surface water at the court to keep visitors safe. With cars crossing over the drain, the grates are certified to AS 3996 Load Class D.

### Benefits

- Ductile Iron slotted **Heelsafe**® Anti-Slip grates, providing pedestrian friendly surface water management.
- Certified to AS 3996 Class D loading, the grate matches the NZTA load requirements.
- Recesses in the edge rail fit around 'anti-shunt' lugs on the grate to prevent longitudinal movement.
