

ACO Drain

PowerDrain S100K

PORTFOLIO

New World Ravenswood Canterbury Region

At the car park entrance and the loading dock around the new built New World Ravenswood supermarket, you'll spot our ACO PowerDrain S100K installed throughout the build year 2021. The system endures cars and heavy trucks passing over it. The ductile iron, fully boltless locking grates are equipped with Anti-Shunt lugs that prevent longitudinal displacement. Certified up to Load Class G, this system is ideal for areas that are frequently trafficked by cars and trucks and allows for high point loads.

Benefits

- ACO PowerDrain S100K with Ductile Iron grates, providing heavy duty trafficable surface water management.
- Ductile Iron Edge Rail - integrally cast-in rail provides maximum strength and protection for the channel body.
- Recesses in the edge rail fit around 'anti-shunt' lugs on the grate to prevent longitudinal movement.
- Certified to AS 3996 Load Class G.
