

ACO Drain

PowerDrain S100K

PORTFOLIO

Novotel Tainui Hamilton

In March 2020 the Novotel in Hamilton had gone through an expansion project to increase its capacity by 40 rooms. Opened in 1999 the hotel belongs to the Accor Group, a multinational hospitality company, represented by 31 locations in New Zealand. As a part of the project, ACO's PowerDrain S100K together with ductile iron grates have been installed at the external entrance area of the site in Hamilton, providing efficient surface water management and ensuring pedestrian safety for the hotel guests welcomed in this area.

Benefits

- ACO's PowerDrain S100K with Iron Intercept grates is certified to AS 3996 Load Class G (900kN).
- Ductile Iron Edge Rail - integrally cast-in rail provides maximum strength and protection for the channel body.
- Recesses in the edge rail fit around 'anti-shunt' lugs on the grate to prevent longitudinal movement.
- AS 1428.2 (Clause 9c) compliant for wheelchair and walking cane safety
