

ACO Drain

PowerDrain S100K

PORTFOLIO

Hagley Mews Apartments

In winter 2019 the Hagley Mews Apartments in Christchurch have been supplied with our ACO PowerDrain S100K sloped system along with Ductile Iron **Heelsafe**® Anti-Slip grates.

Our S100K is used for high loading class applications, where strength is required, making this product fit for any dynamic traffic that the drain comes in contact with while also being wheelchair and walking cane safe. Overall PowerDrain keeps the driveway safe from ponding surface water, ensures safety and meets all load class requirements.

Benefits

- ACO's PowerDrain S100K with Ductile Iron **Heelsafe**® Anti-Slip grates, providing trafficable surface water management.
- Ductile Iron Edge Rail - integrally cast-in rail provides maximum strength and protection for the channel body.
- Recesses in the edge rail fit around 'anti-shunt' lugs on the grate to prevent longitudinal movement.
- Certified to AS 3996 Load Class G.
