

ACO Drain

PowerDrain S100K

PORTFOLIO

Freshchoice Prebbleton

In June 2020 Prebbleton's newly-built Freshchoice supermarket was the first supermarket in the small Canterbury town to open its doors to the public. Along with a newly-built car park the local community gained a 1300m² local shopping opportunity. To provide an effective surface water management throughout the site, ACO put forward the PowerDrain S100K trench drain system for runs in the carpark and the KlassikDrain K100 for the landscaped area around the building. Together with **Heelsafe**® Anti-Slip grates ACO's channel drains prevent slipping hazards, ensuring pedestrian safety.

Benefits

- Ductile Iron grate with **Heelsafe**® Anti-Slip, providing a pedestrian friendly surface water management.
- Ductile Iron Edge Rail - integrally cast-in rail provides maximum strength and protection for the channel body.
- Recesses in the edge rail fit around 'anti-shunt' lugs on the grate to prevent longitudinal movement.
- Certified to AS 3996 Load Class G (900kN).
