

ACO Drain

PowerDrain S200K

PORTFOLIO

The Terrace Car Park

Our Installation at the Terrace Car Park in Christchurchs Central City was specified for its long lasting and proven product features. Having a large catchment area to cope with at the entrance of the carpark with zero ponding allowed, ACO's PowerDrain S200K was installed to manage the surface water, keeping pedestrian and cars safe. Completed with **Heelsafe**® Anti-Slip, wheelchair, walking cane and bicycle safe grates, it's the best solution for public spaces. The system is classified to Load Class D, making this the perfect grate - channel combo for this location and its environment.

Benefits

- ACO's PowerDrain S200K with **Heelsafe**® Anti-Slip grates, providing a safe and trafficable surface water management.
- AS 1428.2 (Clause 9c) compliant for wheelchair and walking cane safety.
- Recesses in the edge rail fit around 'anti-shunt' lugs on the grate to prevent longitudinal movement.
- Certified to AS 3996 Load Class D.
