

## ACO Infrastructure

### Qmax 465

#### PORTFOLIO

##### Ports of Auckland

During the extension of the wharfs, ACO was involved in different stages of the project. As part of the hard stand replacement at the wharf in February 2019, ACO supplied its Qmax systems: 160m of Qmax 465 and additional 80m of Qmax 365. Withstanding high loads, the Qmax slot drainage system is designed for applications, where a robust & high capacity system is required. Also being manufactured from lightweight polyethylene, the 2m drain ensures easy handling and installation.

##### Benefits

- ACO's Qmax 465 is manufactured from lightweight polyethylene, ensuring easy handling and installation.
- Stiff rib design provides high strength.
- Discreet Q-Flow galvanised steel slot (26mm wide inlet slot)
- Certified to AS 3996 Load Class G (900kn)
