

ACO ThresholdDrain

Cantilever ThresholdDrain

PORTFOLIO

ASB Waterfront Theatre

Auckland Theatre Company sought to create a purpose built venue to stage their productions. As one of the leading theatre companies in New Zealand, they desired a performance space to match their shows: their site in the Wynyard Quarter was born. The ground floor of the building features a cafe, bar and gallery, as well as the main entrance to the box office and theatre. Architects were concerned about ingress of water in the sea-front location, so chose to use a Cantilever ThresholdDrain.

Benefits

- ACO's Cantilever ThresholdDrain with Stainless Steel grate, providing a pedestrian friendly surface water management and collects runoff from doors and windows during storms.
- It provides E2 compliant level threshold drainage and complies with AS 1428.2 (Clause 9c), ensuring safe passage of walking canes and wheelchairs.
- The grate is corrosion resistant and provides an attractive architectural finish.
