

ACO ThresholdDrain

Cantilever ThresholdDrain

PORTFOLIO

Continental Cars Ferrari

Continental Cars' Ferrari dealership is a flagship store for the brand. Strict corporate guidelines dictated many of the design decisions, however ACO was able to provide a solution for New Zealand specific level threshold drainage. The fit out of the interior featured the signature Ferrari red, and liberal amounts of stainless steel. Architects sought to link inside and out by using the Stainless Steel 5 star **Heelsafe**® Anti-Slip grate at level thresholds.

Benefits

- ACO's Cantilever ThresholdDrain with Stainless Steel 5 Star **Heelsafe**® Anti-Slip grate, providing a pedestrian friendly surface water management and collects runoff from doors and windows during storms.
- The system provides level threshold drainage, complying with the E2 NZ Building Code.
- The grate matches the stainless steel features across the site, creating an attractive architectural finish.
